Worksheet Cryptography 3: Polyalphabetic Ciphers

1. Fill in the blanks below.

   (a) Shift ciphers are vulnerable because they can be hacked using frequency analysis and guess-n-check.

   (b) Transposition ciphers are vulnerable because they just scramble the letters.

2. Progressive Caesar Cipher (Sequential Shift)

   (a) Using a private key of $A \to J$ (and sequential shift), encrypt the word C O N S T I T U T I O N.

   L Y Y E G
   W I K Z
   G G

   (b) Using a private key of $A \to D$, decrypt the ciphertext
   W L J X P O Q D Z R G V T F V G I F Z

   The right of the people

   See extra page for more detail.

   (c) What are some advantages of this cipher?

   It's easy to remember & implement, theoretically key is short

   (d) What are some disadvantages of this cipher?

   It's a pain to have to carry a tabula recta
   It's vulnerable to frequency analysis with very long messages

(a) Using a private key of $A \to J$ (and sequential shift), encrypt the word

C O N S T I T U T I O N. ← 12 letters

			A	B	C	D	E	F	G	H	I	J	K	L	M	N	O	P	Q	R	S	T	U	V	W	X	Y	Z

B I L L O F R I G H T S

(c) What are some advantages of this cipher?

relatively strong
can use short keyword, with repeated letters
same letter encoded in different ways

(d) What are some disadvantages of this cipher?

long messages are vulnerable to frequency analysis
kind of a pain to encrypt & decrypt

Optional Challenge: The following ciphertext was encoded using a Vigenère cipher with key `AMENDMENT`. What is the plaintext?

NAWBO PMRKS TEYOU RGBMQ SSSQE PXBQU HDDXR KEPMA DZCUH UEIJL FLBNT FLRFA RFXNF SSWTI BPNQV ARDMA MIYIB IIEEU UF-MAD YEAGE DXBEQ TEXSO VVEQH ORLMA

No soldier shall in time of peace be quartered in any house without the content of the owner nor in time of war but in a manner to be prescribed by law.
